### Kitemark

A world-renowned symbol of trust, integrity and quality, Leisure is proud that a number of its products have earned the BSI Kitemark seal of approval. Auditing the superiority of our sinks as well as the quality management systems we have in place on a regular basis, the Kitemark is indisputable proof of manufacturing distinction. The Kitemark is not easy to attain, which is perhaps why it offers unprecedented peace of mind. Furthermore, recent polls reveal that more than 60% of consumers would choose a product affiliated with the BSI Kitemark over a similarly priced product.

ISN'T  
GEORGE  
SWEET

Leaving it there for me to find. He knew how I hated our old sink. And now this heavenly surprise. Leisure of all things. Nothing but the best for George. It looks so right and is so sensible. That ultra-deep bowl. Positively masses of draining board. And such a wonderful white. Obviously designed by a woman. But it was bought by my George. Bless him!

## QUALITY & AWARDS

To emphasise the importance placed on quality, a number of models in Leisure's stainless steel range have been awarded the BSI Kitemark in recognition of their high specification manufacture and finish. Audited to the highest manufacturing standards, they remain the only sink manufacturer to be awarded this accolade. In addition, all products meet the exacting criteria set out by several international standards, including the ISO 14001, signifying excellent environmental management systems, and ISO 9001, which recognises fully integrated quality management systems.

As a responsible manufacturer and supplier of high-quality domestic sinks, all of our Leisure Sinks carry a CE certification mark and the standard EN 13310, which is the standard in the UK to which our products comply with in order to carry the mark.

## OUR WARRANTY

### STAINLESS STEEL

Made from high grade 18/10 stainless steel with seamless soldering and a rigid frame construction, our steel sinks are heavy duty in construction and won't bend or flex under pressure. For extra scratch resistance, choose between Linen or Brushed Steel finishes. Those seeking a modern high-shine surface can opt for Satin Steel or the even shinier Polished Steel finish.

### COMPOSITE

Constructed from an exclusive compound developed over many years, our composite sinks feature 70% quartz particles for a unique surface that's similar to granite in terms of durability but much more flexible in design. Offering high scratch and impact resistance, our composite sinks are easy to clean and can withstand temperatures up to 230°C so can safely accommodate hot pans and boiling liquids.

### FIRE-CLAY CERAMIC

The benefits of buying a ceramic sink can be found in their completely non-porous, stain-proof surface that won't fade or discolour. Perfect for the more traditional home or those looking to coordinate modern white worktops, Leisure's heavyweight fire-clay ceramic sinks are made using high quality raw materials alongside tried and tested manufacturing techniques to achieve perfect results time after time.

### TAPS & WASTE DISPOSAL UNITS

Combining style, quality and engineering excellence, Leisure Sinks offers a vast selection of taps for you to choose from, with styles ranging from 'über' cool to the perfectly practical there's sure to be a design to match your choice of sink.

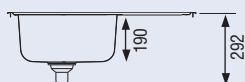

# PROLINE

Modern functionality with high quality, Proline is a pleasure to look at and work with. The 1½ bowl features include a pop-up waste and a stainless steel strainer bowl.

## SHALLOW BOWL WITH HEAT PROTECTION

### Lexin LE95\_SB/

The shallow bowl Lexin sink features pads on the base to reduce sound and heat transfer from hot water within the bowl when the sink base is open. This advance considers kitchen designs for wheelchair access, averting burns when skin contacts the underside of the sink, whilst the 120mm depth bowl provides a solution for those with less reach.

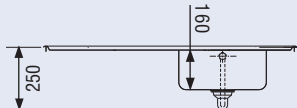

# CONTRACT SINKS

Our collection of sit-on sinks offers a range of bowl and drainer configurations, including three Kitemark approved designs.

## NEW IMPROVED LEISURE WEBSITE

[www.leisuresinks.co.uk](http://www.leisuresinks.co.uk)

The newly redesigned and upgraded website contains information about Leisure's complete product portfolio, including its range of stainless steel, composite and ceramic sinks, as well as its vast collection of taps. There is also a facility allowing users to locate their nearest Leisure Sinks stockist, along with a dedicated page explaining the full array of product warranties available.

# COMPOSITE SINK

## MATERIALS & COLOURS

### Neostone

Neostone incorporates 70% quartz particles creating a unique granite-effect finish which is incredibly durable, highly scratch resistant and can withstand temperatures of up to 230 degrees centigrade.

### Velstra

Velstra, a similarly advanced material is equally practical offering both durability and superior hygienic properties in a range of solid colours.

# FIRE-CLAY CERAMIC

## Leisure Belfast Sink

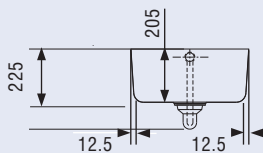

The benefits of buying a ceramic sink can be found in their completely non-porous, stain-proof surface that won't fade or discolour. Perfect for the more traditional home or those looking to coordinate modern white worktops, Leisure's heavyweight fire-clay ceramic sinks are made using high quality raw materials alongside tried and tested manufacturing techniques to achieve fantastic results time after time.

## BELFAST

Add a traditional British look to your kitchen with our Fire-Clay ceramic Belfast Style sink, a hygienic option which is incredibly easy to keep clean.

# AQUANOMIC TAPS

With an eye to the future, Leisure Sinks have put together a range of kitchen taps under the Aqunomic name, approved to meet the latest building regulations in accordance with the Code for Sustainable Homes, set by the government.

Homes with higher ratings will be more energy efficient, and for the home owner there is less waste and lower running costs. Fitted with a flow restrictor, the Aqunomic taps have been developed to help comply with the water category of the code by restricting the flow rate to 3.8ltrs per minute per tap. The amount of water usage in the home is monitored and by using an Aqunomic tap, will help comply with these regulations.

## WASTE DISPOSAL UNITS

Our range of waste disposers are clean, hygienic and easy to use. All units have a lifetime corrosion guarantee and contain Bio Shield, where disposers are treated with an antimicrobial agent moulded inside providing protection against odour causing bacteria growth. Available in four different sizes each model is easy and fast to install and can be fitted with only a standard mains connection. Using a waste disposal unit helps cut down household waste and reduces the amount of rubbish that ends up in landfill sites.

- High Efficiency Permanent Magnet Motor
- Lightweight Compact Design
- Handles all types of waste
- Removable splash guards
- Plumb-easy mounting system
- High quality components
